STORM WINDOWS

**400 SERIES**

# Gentek Storm Windows

Gentek aluminum storm windows are a simple, practical and economical way to increase the efficiency of existing windows. Storm windows can be installed on your house, cottage, historical buildings and they can even be used for three season sun-rooms or porch enclosures.

How do storm windows help?

When storm windows are installed over existing windows there is an air space created between the two windows reducing air movement. This air space creates a thermal barrier increasing the efficiency of the window which saves you money by reducing heating and air conditioning costs.
